What fret you start is up to the clock on the wall. Using PMAN method, it's possible to tell what time it is with your guitar.

The time in your mesonome is the minutes:

12 11 10 9 8 7 6 5 4 3 2 1 0

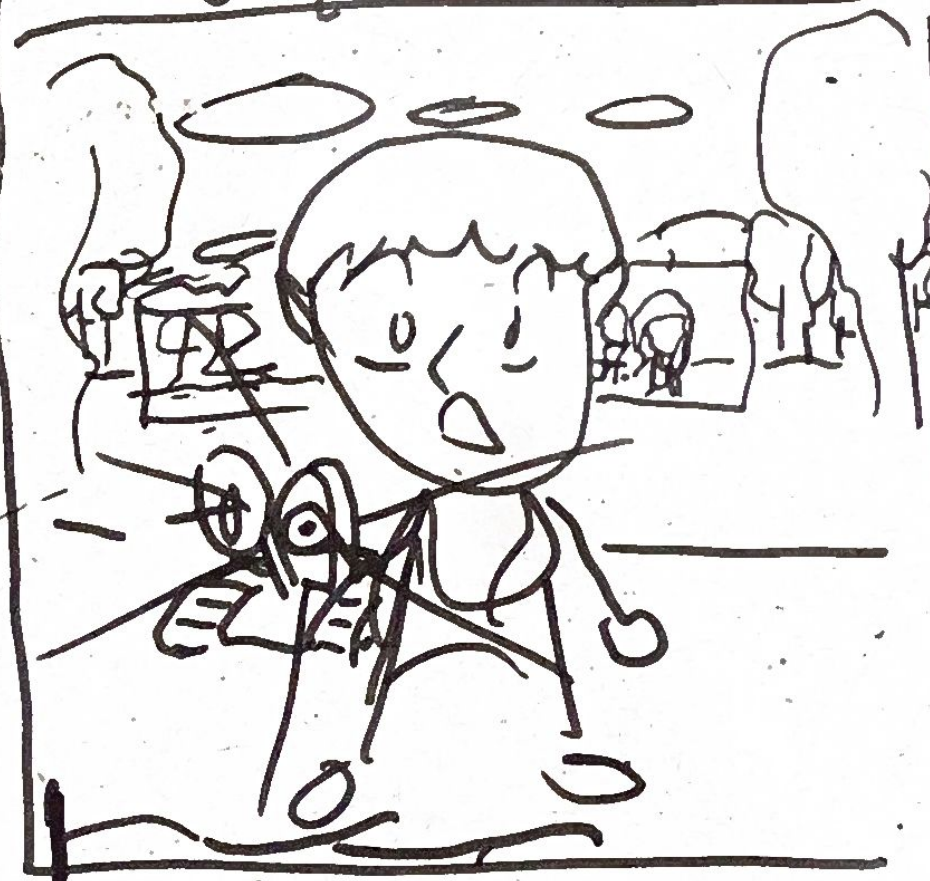

That's as much as they ask in mini-mesons...

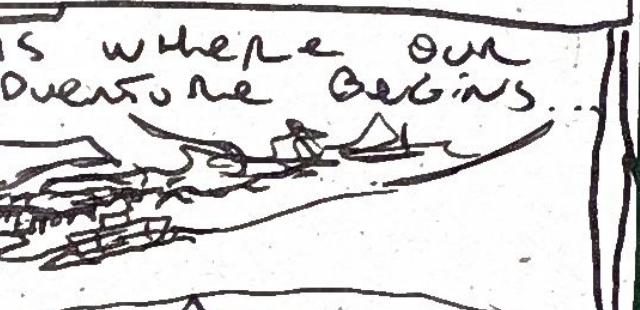

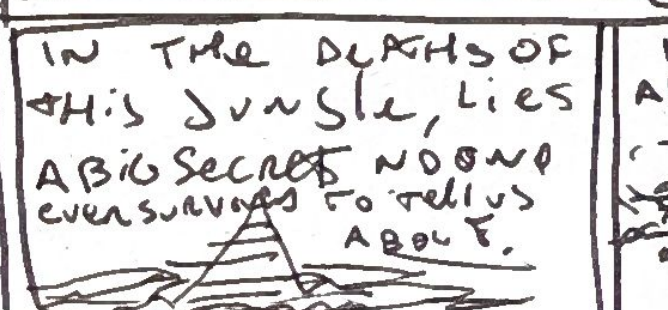

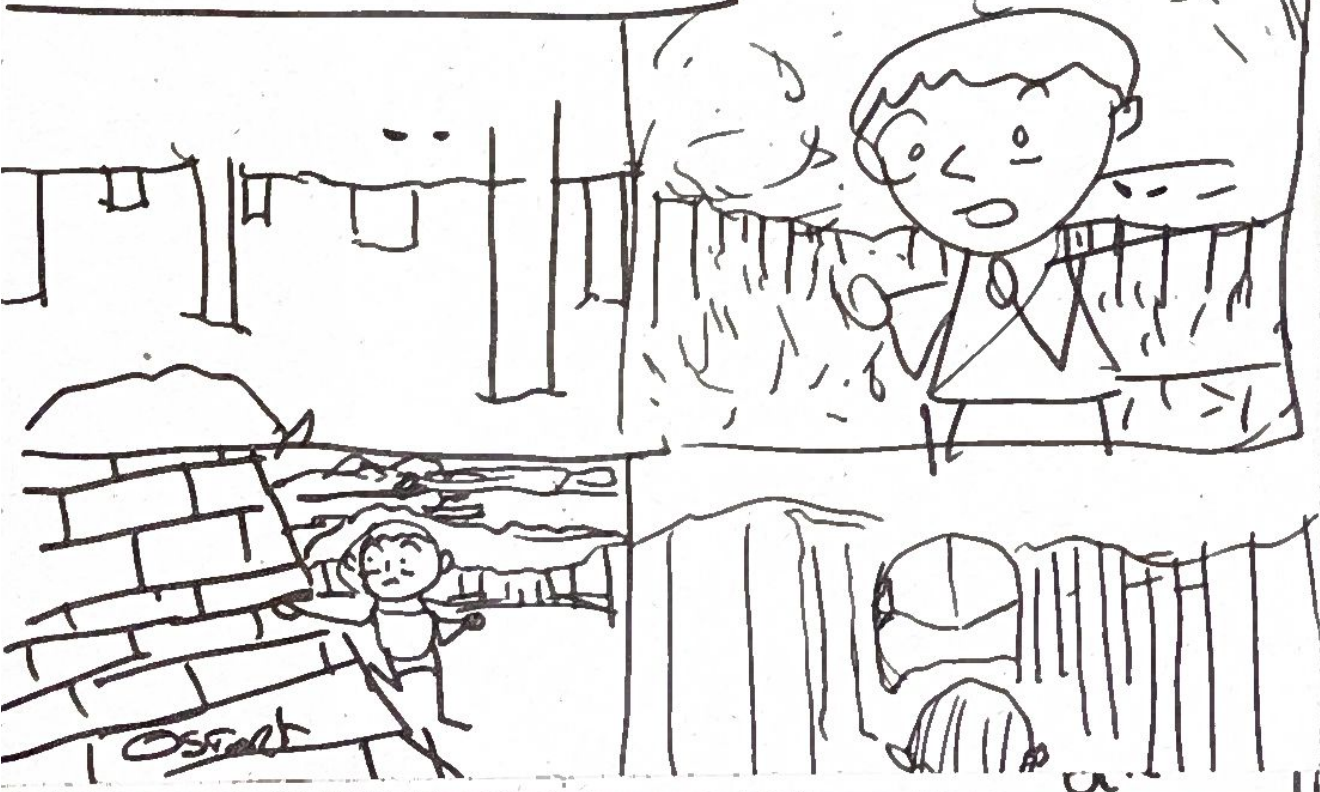

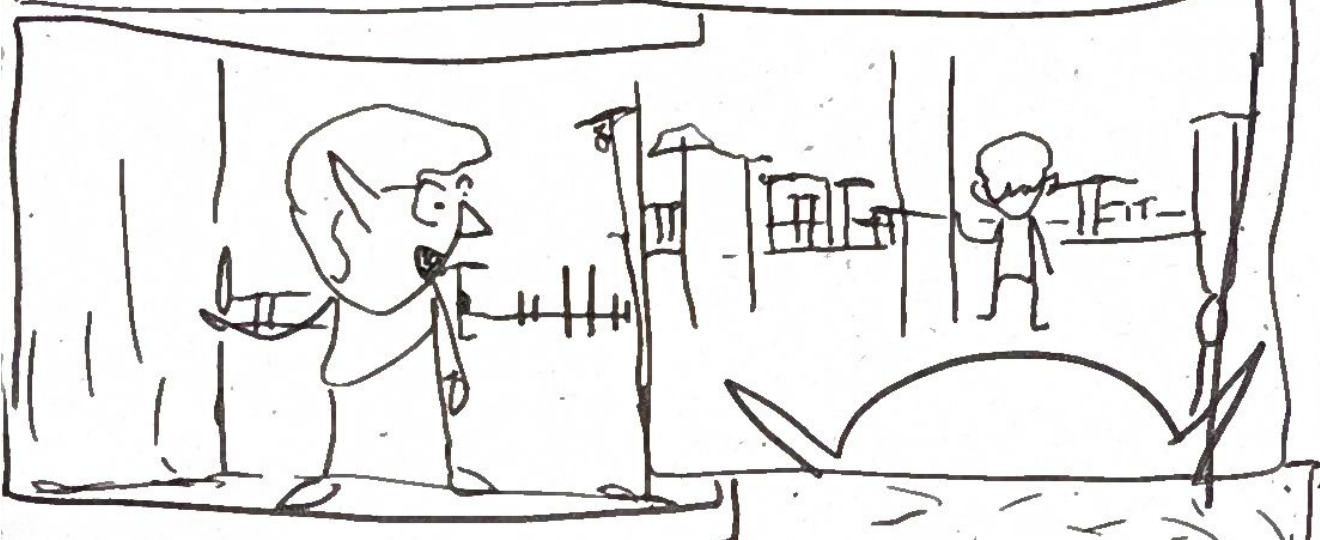

The time in your clock make weekday, hour, and minute. Now you know you have a mode for every day, a position for every hour, you can start your songs, and for every minute, a tempo in your mesonome.

What time is it? It's time to play guitar!
